

Introducing...

EZ-sensor™
Programmable Tire Pressure Monitoring Sensor

- Eliminate lost sales
- Manage inventory of slow moving sensors
- Reduce risk of installing the wrong part
- No need to purchase additional costly programming tools
- Works with the Schrader and Bartec OBD learn tools you already own
- Allow consumers to own a second set of wheels and tires that will not require a relearn after exchange

Always have the Right Part, Right Away

Two EZ-to-program snap-in sensors will eventually replace over 90% of OEM SKUs.
Capable of having ASIC ID learned using a hand held MLF (Modulated Low Frequency) tool.
Capable of having RF Protocol and sensor timings, learned using a hand held MLF tool.
Can be programmed with Schrader 21230, NAPA 92-1525 and Bartec Tech400 learn tools.

First sensor SKU for Toyota, Lexus and Subaru applications to be launched in 3rd quarter 2010. Additional applications and additional sensor to be available at a later date.
