With Schrader® AirAware™ TPMS Retrofit Kits

Schrader® AirAware™ TPMS Retrofit Kits install on vehicles not equipped with original-equipment systems. The stand-alone kits include a dash-mounted receiver display, four wheel-mounted transmitters that fit most wheel applications and installation instructions.

AirAware TPMS retrofit kits:

- Monitor tire pressure in all four tires.
- Detect under-inflation of 25 percent or more.
- Capable of monitoring spare tire. Fifth sensor sold separately. Order part no. 20154.

TPMS systems monitor proper tire pressure to maintain vehicle performance and support safety.

Properly inflated tires:

- Improve vehicle handling
- Reduce braking distances
- Lower the risk of hydroplaning
- Decrease tire wear
- Improve fuel efficiency

Schrader offers two kits:

- 20257 - hard wired to switched wires
- 20256 - battery operated (two AA batteries included)

Tire changing equipment and snap-in valve insertion tool required to install sensors. Professional service recommended for hard-wiring installation.

Not recommended for use on trailers.
